

工作测振仪

HY-106C is a portable instrument integrated with the functions of vibrometer, radiation thermometer and tachometer. Supported by a PC and associated software, it can achieve condition monitor and faults diagnosis in multi-ways. The simplified methods of dynamic balance calibration is its another trait.

Specification

- Data Memory 8M bytes
- USB communication interface port
- The LCD of graph dots matrix displays complete Chinese text and graphic information.
- Using Touch Memory™ to identify the scheduled facility automatically
- Afford a real time clock

便携式 数据采集仪，集振动、温度和转速测量功能于一体。利用 PC 机和相关的软件，完成点检的全方位监控和故障分析。方便易用的动平衡校正功能，是本机的另一大特色。

技术 参数

- 数据存储空间：8MB
- 通讯方式：USB
- 液晶中文和图形化信息显示
- 采用电子标签 Touch Memory™ 技术自动识别被测设备
- 实时时钟
