

HY-103C

# 振动监测仪

HY-103C is a fixedly installed mono-channel on-line vibration monitor for measuring the parameters of acceleration, velocity and displacement of vibration from the mechanical equipment, and giving alarm indication on dual scales. It is mainly applied in condition monitoring for the key facilities in the industrial firms.

**振动** 监测仪是一种固定安装的单通道振动在线监测仪器，可测量机械设备的振动加速度、速度或位移，并具有二级超限报警功能，主要用于对工矿企业中关键设备的状态监测。
